

MIL-STD-130, *Identification Marking of U.S. Military Property*, notes its scope as follows:

**1.1 Scope.** This standard provides the item marking criteria for development of specific marking requirements and methods for identification of items of military property produced, stocked, stored, and issued by or for the Department of Defense. This standard addresses criteria and data content for both free text and machine-readable information (MRI) applications of item identification marking.

With respect to automatic identification technology (AIT), MIL-STD-130 contains two-dimensional bar code requirements for item marking, packaging, supply documentation, and shipment documentation
