

Product Manager Joint –Automatic Identification Technology (PM J-AIT) is the Army Product Management Office for total radio frequency identification (RFID) and AIT solutions. As an RFID technology leader, PM J-AIT provides global asset tracking and Web-based radio frequency in-transit visibility (RF-ITV) services through the upgrade, implementation, and maintenance of the RF-ITV system. PM J-AIT offers a single point of contact for acquisition support and technical expertise for Joint Services, Federal agencies, NATO, and multinational forces by establishing and maintaining contract vehicles for the procurement of AIT products and services. PM J-AIT offers complete program life cycle support while providing the Joint Warfighter and Coalition partners with automated, near real-time ITV of their materiel and equipment worldwide. PM J-AIT also supports multinational information sharing by the DoD with NATO and Coalition partners. Their organizational web site is: <http://www.ait.army.mil/>

Each month, PM J-AIT, with assistance from Combined Arms Support Command (CASCOM), produces a technical newsletter that is widely distributed in the AIT community. The newsletter is a free publication. You may contact them to start receiving this free resource with all the latest about AIT applications in the field including user tips and guidance.
