RECEIPT/SHIPMENT-CONSOLIDATION/DUE-IN/REPSHIP4

ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Change

Description:

In the MAN02 (DE87) at index 69-02 modify the usage note to read: "Code list includes '444', '555', '777', '999', 'Exx', 'Nxx', 'Sxx' and 'Xxx'. (As a measure of consistency between this 856A IC and the 858B IC enter triple-position codes 'Exx', 'Nxx', 'Sxx' and 'Xxx' where the first byte is literal and the 'xx' represent any valid alpha-numeric value that completes the code as defined by the Supply Community)."

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

The second and third bytes of the codes beginning with N, E, S and X have significance to the Supply Community. Current implementation limiting values to 'NNN' and 'EEE' are too restrictive and do not allow Supply operations to take full advantage of the implementation of the Special Requirements codes.

ITEM 5: PRIORITY/REQUIRED DATE

Identify priority and required date of change.

PRIORITY: (R) - Routine

Required by date: 05/24/2012

Administration change only. No DTEB vote required for approval.	Vote required.
