

## **APPENDIX BB**

### **AIR DIMENSION CODES**

The air dimension code is used for all air shipments. The code indicates whether shipments have one or more oversized dimensions (greater than 84 inches) and/or are consolidations (shipments of multiple requisitions). The most current version of Air Dimension codes is available at the USTRANSCOM Reference Data Management System website at: <https://trdm.c2.amc.af.mil/trdm/index.jsp>, then click on DTR Data and Air Dimension Code. Select Display Data from Action Legends box. They are accessible by all users, to include Department of Defense contractors and vendors through the Defense Transportation Electronic Business website at <http://www.transcom.mil/dteb/>, click on Reference Data.
