

APPENDIX GG

TRANSPORTATION METHOD CODES

A. GENERAL

The method type identifies the specific method (e.g., motor, rail, air freight, or parcel post), used for each segment of movement within the Defense Transportation System. When preparing advance Transportation Control and Movement Documents for submission to a clearance authority, the code selected identifies the method of transportation, which will deliver the shipment to the Port of Embarkation. The most current version of Transportation Method is available at the USTRANSCOM Reference Data Management System website at: <https://trdm.c2.amc.af.mil/trdm/index.jsp>, then click on DTR Data and Transportation Method. Select Display Data from Action Legends box. They are accessible by all users, to include Department of Defense contractors and vendors through the Defense Transportation Electronic Business website at <http://www.transcom.mil/dteb/>, click on Reference Data.
