

## APPENDIX NN

### WATER TYPE CARGO CODE

#### A. GENERAL

The water commodity, type cargo, and special handling codes are a five-position combination. This combination is obtained using a selection from the TRDM website at:

<https://trdm.c2.amc.af.mil/trdm/index.jsp>, then select DTR Data DTR Data and Water Commodity. Select Display Data from Action Legends box, for the three position water commodity code;

<https://trdm.c2.amc.af.mil/trdm/index.jsp>, then select DTR Data and type of cargo. Select Display Data from Action Legends box, for the fourth position type of cargo code and

<https://trdm.c2.amc.af.mil/trdm/index.jsp>, then select DTR Data and special handling code. Select Display Data from Action Legends box for the fifth position special handling code. The specific special handling requirements are usually further identified in trailer data (e.g., actual temperature control range, type of hazardous materiel, or outsize dimensions). These codes are also accessible by all users, to include Department of Defense contractors and vendors through the Defense Transportation Electronic Business website at <http://www.transcom.mil/dteb/>, click on Reference Data.

#### B. TYPE CODE

The fourth position of the five-position code identifies certain types of cargo, primarily those, which are hazardous. (When two or more codes apply to a shipment unit, the type of cargo code representing the greatest hazard (in the order of hazards from 49 Code of Federal Regulations) is used. An in-the-clear description of other type of cargo codes is included in miscellaneous information trailer data (Document Identifier [DI] T\_9). For example: A shipment “subject to damage from heat” and a “Poison Class B” is coded with a “P” for type cargo and “subject to damage from heat” is entered as miscellaneous trailer data (DI T\_9).
