- (6) Dangerous Good Shipments. “In accordance with the requirements of SOLAS 74 and the IMDG Code, the primary requirements of a dangerous goods shipping document is to clearly and concisely convey the fundamental and required information of regulated HAZMAT being transported internationally. It is not the intent to require a separate transportation document for dangerous goods when a consignment contains both dangerous and non-dangerous goods or to restrict the number of individual dangerous goods descriptions that may appear on a single document”. Officials of all countries are now monitoring HAZMAT containers very closely. This will mean a more intensive check on documentation. Containers arriving with an inaccurate DD Form 2890, [Figure 515-1](#), for HAZMAT cargo will be frustrated at the port of discharge. To avoid confusion and to try to alleviate further errors during the shipment of HAZMAT, guidance on using the proper shipping forms and documentation for transporting HAZMAT is being provided as follows:
