

DOD Inventory Process

Mr. Thomas Catchings
Lead, Programs, System & Training

DOD Inventory Process

The Joint Intermodal Working Group approved the SDDC recommendation to use the Army Container Asset Management System (ACAMS) as the system of record for all Services to use for completing the DoD Biennial Inventory.

DOD Inventory Process

-Inventory categories

- Owner verification - assets that are owned and /or the property of that individual user.
 - Location verification - assets that are actually on-hand at their location.
- All updates and/or adjustments to the inventory and related data elements were processed in ACAMS.

DOD Inventory Process

(additional update)

- Container Serviceability
 - current status
 - next CSC inspection
- Current Use
 - storage, transportation, etc
- Update incorrect fields
