

**MILITARY SURFACE DEPLOYMENT
& DISTRIBUTION COMMAND**

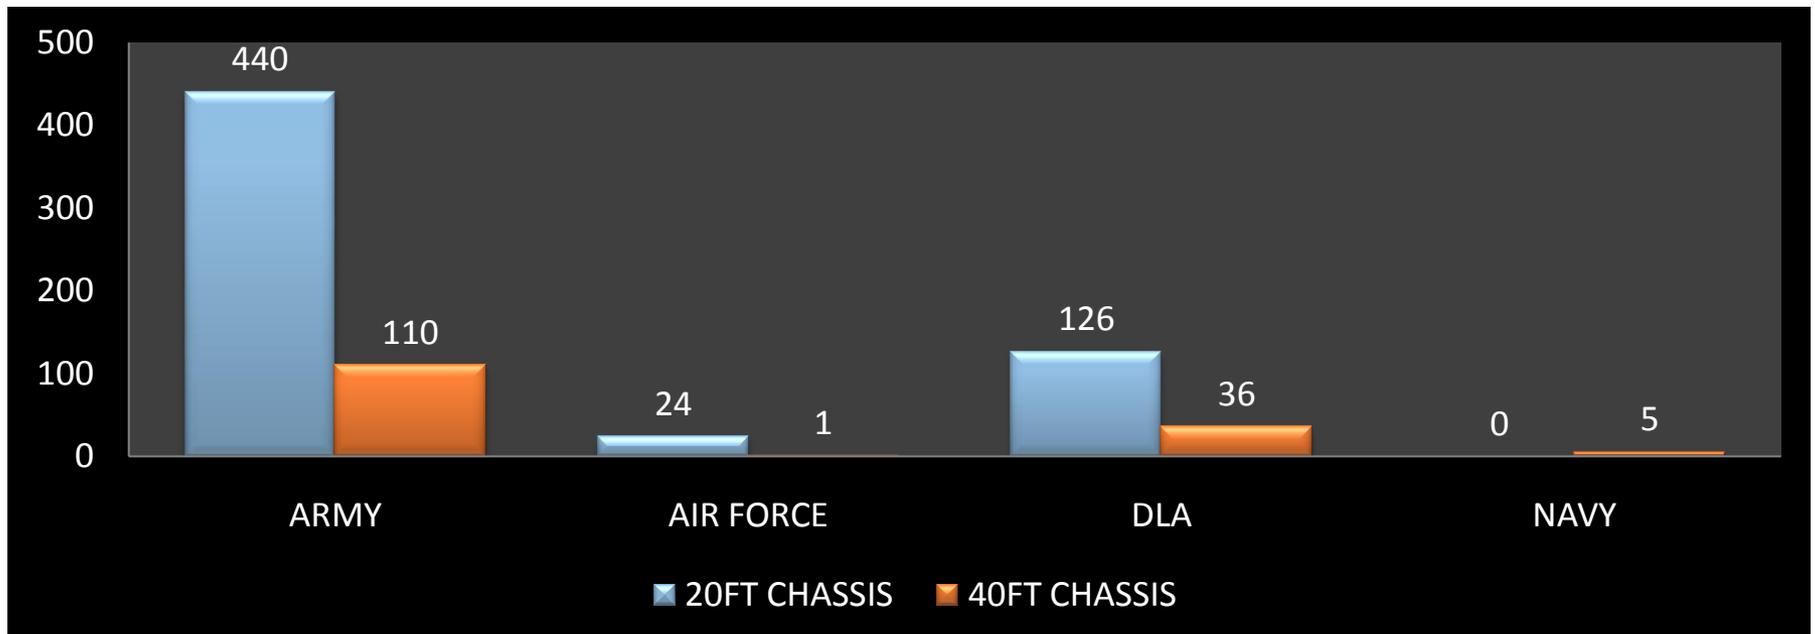

**Joint Intermodal Working Group
Inspection Criteria for Chassis**

Thomas catchings

29 June 11

Inspection Criteria for Chassis

- Background
 - DOD Services paid over \$170K in chassis damage claims since AUG 2000
 - No chassis inspection language in Master Lease Contract to dispute damage claims
- Number of chassis leases by Service since FY10

Inspection Criteria for Chassis

- Challenges to chassis modification in MLC
 - Certified inspectors @ time of equipment delivery
 - Chassis loaded with container
 - Timeframe to identify chassis deficiencies
 - Location of contractor inspection checklist
 - IICL standard
- Proposed language
 - Federal Highway Administration (FHWA) regulations
 - Standard chassis inspection checklist
 - Ability for contractor's driver & DOD personnel to conduct inspection

Inspection Criteria for Chassis

- Proposed chassis inspection language
 - At time of redelivery, the truck driver and the redelivery unit POC shall perform a walk-around visual and audible inspection of the chassis equipment.
 - Any damage or deficiencies at time of redelivery shall be noted on either the interchange paperwork or a DA Form 2404.
 - Any damages noted by the unit shall be communicated to the driver so the deficiency can be reported to and repaired by the Intermodal Equipment Provider (IEP) upon return to the depot.
 - Both the driver and redelivery POC shall sign the paperwork.
 - The paperwork shall be forwarded to the issuing office as stated on the delivery order as evidence of the equipment condition at time of redelivery and used to validate damage claims by the leasing company.

Inspection Criteria for Chassis

Brief JIWG on chassis modification to MLC 29 Jun 11

Chassis Language Modification entered into MLC 16 Jun 2011

GCM COR submitted chassis language to USTRANSCOM
