Liner Ocean Transportation Program
Stabilized Breakbulk/Dry Cargo and
Container Billing Rates

The liner ocean transportation program stabilized cargo billing rates establish the amount Defense Transportation System (DTS) shippers will be billed for the movement of breakbulk/dry and containerized cargo through the DTS. Application of these billing rates is restricted to cargo that moves on scheduled commercial ocean liner service and is either booked by the Military Surface Deployment and Distribution Command (SDDC) or through one of the SDDC's booking systems.

In rare cases, customers will be billed using a method other than stabilized billing rates. Supplemental charges may be applied to the published stabilized billing rates or costs plus fee charges may be used to recover extraordinary costs that were not built into the rate basis when the billing rates were originally developed. Such cases include one-time-only shipments, multi-modal CONOPS and other unique customer requirements.

The billing rates are defined in terms of Measurement Tons (MTONs) and their application is based upon the commodity being moved. One MTON is equivalent to 40 cubic feet. A discussion of the various Cargo Commodity (CC) Codes and an explanation of the procedures used for their application are presented below.

Determination of the applicable stabilized cargo billing rate is based upon Traffic Area (TA) Code pair (defined below) associated with the seaports of embarkation and debarkation used for the cargo movement. The billing rates are symmetrical and are the same irrespective of the direction of the actual cargo movement (i.e., the billing rate for CONUS East Coast (01) to Northern Europe (17) is the same for Northern Europe (17) to the CONUS East Coast (01)).

Traffic area, 99, which was established for FY12 for surface shipments going into and out of Afghanistan, will remain in effect for FY13 also. Rates for traffic area 99 apply regardless of route (NDN or PAKGLOC) transited.

FY13 rates for commodity code 12 will be billed based on the volume of the container used to move the vehicle vice the mtons of the vehicle.

Charges associated with container detention are not covered by these billing rates and will be billed separately.

Breakbulk/Dry cargo billing rates are all inclusive when door-to-door movement is offered by USC carrier, otherwise the cost of line haul will be additive.

Container billing rates are normally all inclusive and cover all costs associated with the door-to-door movement of a SEAVAN container from its inland point of origin to its final inland destination.
